PROPOSE A TALK

IDE & Tools

Community of
Projects

Collaborative
Working
Groups

Desktop IDEs

Famous for the Java Integrated Development Environment
Support for C/C++, Fortran, Python, and more...

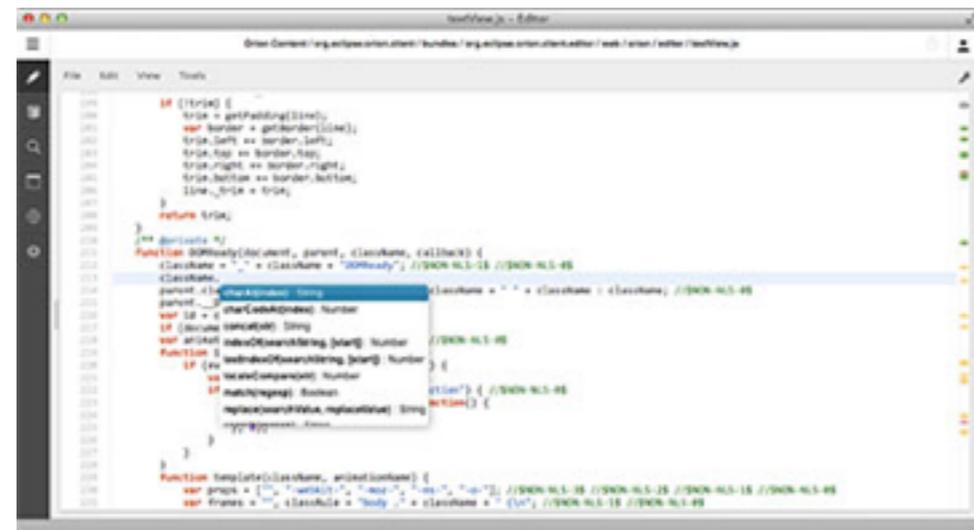

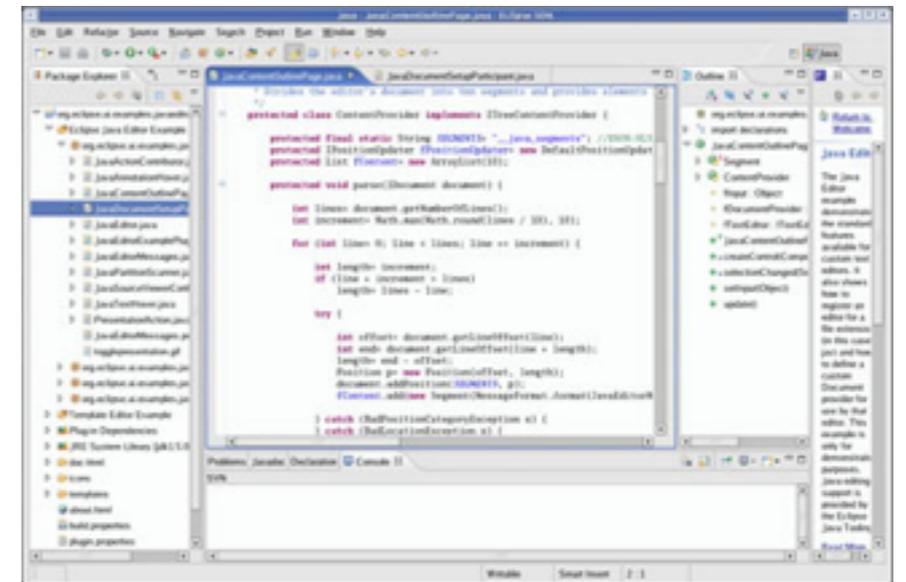

Java

C/C++

Parallel Tools

Cloud IDEs

Browser based development with hosted workspaces
or install desktop packaging

Tools

A huge collection of tools can be easily installed into your Eclipse desktop IDE, including GUI builders and tools for modeling, charting and reporting, testing, and more.

Marketplace

Easily find, install, and vote for new plug-ins from a vast ecosystem of providers.

Extend

Extend the desktop and web-based IDEs by writing your own plug-ins using the Plug-in Development Environment (PDE)

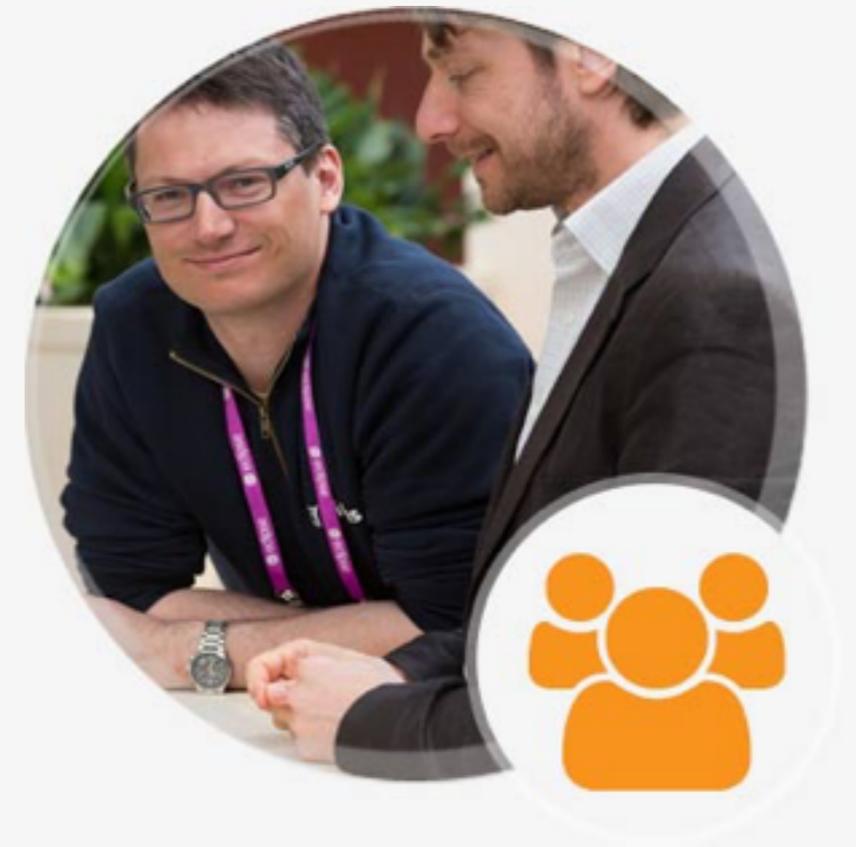

Community of Projects

Eclipse has over **250** different open source projects. Many know the IDE, but there is also a huge ecosystem that spans business reporting to embedded device development to parallel computing.

Eclipse encourages and supports new project proposals!

Collaborative Working Groups

Eclipse **Working Groups** allow for organizations to collaborate in the development of new innovations and solutions. The Eclipse Foundation is a great place to host new collaborations that follow best practices and are based on open source principles.

Research@Eclipse

Science Working Group

Created as a collaboration center for science software, the Science Working Group aims to solve the problem of making science software inter-operable and interchangeable.

SWG is a collaboration involving industry, academia, and government to develop reusable open source software for scientific research.

Current Projects

- ▶ Triquetrum - an open platform for managing and executing scientific workflows
- ▶ Eclipse ICE - an integrated computational environment
- ▶ DAWNSci - a data analysis workbench
- ▶ ChemCclipse - workbench for the analysis of analytical chemistry data
- ▶ Advanced Visualization - 1D, 2D, and 3D visualization toolkit for data analysis and post-processing
